

Time	Type	Context	Question	Answer/Input	Type of problems	Comment
9:53	Hint	Github repo access		Authorize token SSO in GitHub		
10:10	Hint	Databricks Token		Hint to create own token in Databricks	missing documentation, tool	
10:15	Hint	App local		Hint regarding Poetry		
10:23	Question	Databricks	How to create git repo / branching in Databricks	check out Git repo from Databricks	tool, process	
10:25	Question	GitHub Token	Token recreated, not working	need to authorize SSO again		
10:42	Hint	Databricks Data Versioning		schema needs also catalog	tool	
10:50	Question	Dataricks VS Code extension	what does the .bundle do?	only for uploading		
10:51	Question	Pandas	why pandas for dataloader?	only because of custom dataloader use here		
11:07	Remark	Model development		PyTorch model development would be nice, but is skipped here because of time		
11:10	Hint	Model development		Epoch is only defining the epoch, for multiple epochs run in loop	process	
11:16	Hint	MLflow		Hint to read the instructions regarding mlflow	tool	
11:19	Question	MLflow experiments	Where to find experiment	enable show		
11:21	Hint	MLFLOW		if no experiment defined, this will create a new one named like the notebook	tool	
11:22	Question	MLflow	do I need path?	yes		
11:26	Question	MLFlow	where to run mlflow experiment?	skip Giskard cell, next cell is prepared for it		
11:29	Hint	MLflow		easier to first start with logging existing	process	

				model and then training		
12:35	Hint	MLflow		hint regarding mlflow experiment epochs run	tool	
12:37	Question	MLflow	why set registry uri	can also point to unity catalog		
12:41	Question	Giskard / Model training	why error in Giskard	to show evaluation metric		
12:44	Hint	Giskard		model function can be used as model in evaluate	tool	
12:50	Question	Giskard	what does giskard do?	further validation of model regarding potential issues	process	
12:57	Hint	Model Registry		use model name of the existing model	process	
13:15	Hint	orga		gave input about next steps		
13:22	Question	TF	some questions to TF resources	answered respectively	process	
13:23	Question	TF	why tasks wrong order	because of TF module	tool	
13:35	Hint	TF GitHub Actions		issue on branch can be ignored		
13:49	Question	Staging / Unity Catalog	how about disaster recovery	rather use Unity Catalog instead of workspace model registry, provides history	process	thought ahead over scope of this hackathon
13:59	Hint	TF		needs step needed
